Premium WallBanger™ System

PART ID: 1005

Your door knock will never be the same again. Using the Defense Technology™ 7001CI charge, the WallBanger™ will breach a wooden or metal door, window, or even create a shooting port through a wall. Providing stand off, the breacher is able to reach the threshold far enough away to ensure a smooth entrance. Extended, it will deliver a charge to a second floor window. Using interchangeable heads, the WallBanger™ has amazing versatility and durability to overcome the challenges officers encounter. Four attachments are available for use with the WallBanger™:

- The Single WallBanger™** (one Defense Technology™ 8901C1 device)
- The Double WallBanger™** (two Defense Technology™ 8901C1 devices)
- The OC Blaster** (rake and break plus OC deployment)
- The DoorKey™** (flash bang breaching device)
